LAUFEN

LAUFEN – THE COMPANY

LAUFEN

Swiss at heart,
international
by nature.

LAUFEN stands for swissness, quality and design, offering complete bathroom solutions around the world.

Making the bathroom a living environment

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN is one of the world's leading manufacturers with a global distribution network. The company's core competence is its knowledge in the area of sanitary ware manufacturing. Since 1892, the LAUFEN brand has been using the oldest malleable material known to man to make innovative sanitary products in state-of-the-art plants with legendary Swiss precision. Knowledge of the bathroom as a whole is developed from the competence of LAUFEN in ceramics manufacturing, and sophisticated design.

BATHROOM CULTURE SINCE 1892

What makes LAUFEN products unique at first glance is that their Swiss design unites two major design trends: emotional Italian design from the south and the northern tradition of design precision and clarity. For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally-friendly production.

THE CANTON OF BASELSTADT
BETWEEN THE RIVERS ROOD AND RHINE

From humble beginnings to today's global player

When LAUFEN was founded in Switzerland in 1892, sanitation was still a far cry from the standards and comforts offered today; standards, which were particularly influenced by LAUFEN, the only sanitary ceramics producer that manufactures exclusively in Europe.

FIRST EUROPEAN MECHANICAL FACTORY
FOR SANITARY WARE IN ZNOJMO

Some of the production facilities that belong to the company today can be traced back even further into history.

In 1878 for example, the pioneer in the mechanical manufacture of sanitary ceramics was a production site belonging to the Austrian monarchy. It is not just tradition, but also the strong anchor which various European manufacturing sites maintain in their domestic markets, Switzerland, Austria and Czech Republic, that underpin the quality of LAUFEN as a company. LAUFEN's goal then was the same as today: to lead on technology, service and design.

Back in the 1980s, LAUFEN engineers invented the most efficient high-pressure casting technology for ceramic production and therefore ensured a sustainable breakthrough in industrial production.

DEVELOPMENT OF THE LAUFEN WALL HUNG
TOILET BY ENGINEER XAVER JERMANN, 1964

Just as important at LAUFEN are the constant developments in design: wall-mounted WCs and floor-standing washbasins have enabled a new sense of aesthetics. In 2013 LAUFEN's worldwide material innovation Saphirkeramik succeeded in revolutionising the design language of ceramic.

The innovative and valuable patented Saphirkeramik formulation gives the starting material unprecedented possibilities and scopes. Saphirkeramik is used when a design includes thin walled shapes and tight radii.

THE NEW CLASSIC,
DESIGN BY MARCEL Wanders

A building of great symbolic value

THE LAUFEN FORUM WAS DESIGNED BY BASEL BASED ARCHITECTS NISSEN & WENTZLAFF, PHOTOGRAPHED BY MAURIZIO MERCATO.

The LAUFEN Forum is a 6,500 cubic metre architectural statement, a visitor and presentation centre. It is synonymous with perfection in terms of form and craftsmanship and for advanced technology with an unobtrusive face. LAUFEN's headquarters in the canton of Baselland reflect this identity.

Ludovica+Roberto Palomba designed "bowl / 08", a washbasin for the Palomba Collection. Architects Nissen & Wentzlaff then created a larger version of this object in the form of the LAUFEN Forum which stands out with its impressive exposed concrete and elegant statics.

An inventive spirit and desire for technical innovation are also part of the building's concept and require efficient resource usage and an acceptable ecological footprint. As a result, the multi-award-winning building is an outstanding feature in the Basel area, an area which is rich in superb architecture.

With the Forum, LAUFEN has created a new architectural setting for its products: it is a comprehensive architectural statement in concrete with the bathroom at its centre and acknowledges Switzerland unequivocally as the company's headquarters and production site.

In 2024 the Norwegian transdisciplinary studio Snøhetta has redesigned the interior. The LAUFEN Forum unites design, bathroom, swissness and competence in an exceptional showroom. A space for the bathroom with the power to inspire clients, architects, retailers and tradesmen alike as well as providing a source of information.

Live and in person – LAUFEN spaces

EXPERIENCE LAUFEN LIVE

LAUFEN spaces are found in cultural and artistic hubs, as an interdisciplinary, and experiential showroom designed for guests to learn about bathroom ceramics, furniture, faucets, and accessories. Bringing people together is how LAUFEN evolves and celebrates bathroom culture. Each location has its own identity, with its own individual interior design, and they also host temporary exhibitions and installations. LAUFEN spaces can be visited in Berlin, Vienna, Prague, Madrid, Milan and Miami. LAUFEN's newest space openings in Zagreb and Sydney are coming soon.

Amidst a picturesque city centre, the transdisciplinary architecture studio Snøhetta has created an experimental presentation of the LAUFEN portfolio in the Vienna space. The Prague space is inside a 600 m² historic building from the 19th century. Milan space in the design capital's heart mirrors the city's unmistakable creative verve. Located in West Berlin's most iconic street, the Berlin space emanates designer Konstantin Grcic's love for detail and playful abstraction, whilst the space in Miami is part of the Miami Ironside, a complex in old industrial halls with offices and restaurants.

Individual solutions

The individual planning and design of bathrooms is a growing segment of the sanitary market. Architects and planners of high-quality private residences in particular, but also public and semi-public buildings, such as hotels, often require individual solutions that can be fitted precisely into the floor plans of sanitary rooms and bathrooms, in order to meet the special requirements of the client. LAUFEN is adapting to these requirements with numerous solutions from its range of products and creating bathrooms made to measure:

These include, for example, washbasins, ceramic shelves, mirrors and bathroom furniture manufactured to the millimetre, but also colour or customisation options. Even faucets can be individualised, and special handles, logos, colours, and surfaces can be provided as required.

TAILOR-MADE SOLUTIONS CAN BE REALISED TO MEET CUSTOMER REQUIREMENTS

In the meantime, modern solid surface materials are also available that can be used to realise individual customer requirements in the shortest possible time in small quantities. When it comes to washbasins, worktops, accessories, furniture, shower trays, bathtubs, sinks, and even wall coverings, there are almost no limits to creative drive.

This enables architects and designers to create their own designs that harmonise perfectly with the room and decor. LAUFEN also offers a complete service package, which includes feasibility checks, assistance with technical drawings, the manufacture of models and prototypes, the adaptation of accessories, direct shipping, and after-sales service.

VARIETY OF SHAPES THANKS TO MINERAL MATERIALS

LAUFEN – THE HISTORY

1892

It was on 4th July 1892 when the success story of the „Tonwarenfabrik LAUFEN“ started with the production of bricks and clinkers. The company was founded by three men: Albert Borer, Johann Spillmann & Joseph Gerster-Roth.

1898

Demand for earthenware increases to a volume that makes the construction of a second factory in LAUFEN necessary. The factory, which started production in 1898 was mainly used for the production of roof tiles and bricks as well as drainage pipes.

1905

A canteen is installed on the premises, where quality meals are offered for the workers at 40 cents.

1924

The acquisition of the Aktienziegelei Allschwil, the chimney production Allschwil and the brick factory Tranzer had a "positive impact on all brickyards in the LAUFEN valley". As a result, a third kiln is inaugurated. In the same year, the share capital of the "Tonwarenfabrik LAUFEN" is increased to 1 Mio Swiss Francs.

1925

Under the directive of Guido Gerster, CEO and member of the supervisory board of the Tonwarenfabrik LAUFEN, the "Aktien-gesellschaft für keramische Industrie LAUFEN" is established on 26th November. Fire clay is introduced, which enables the company to produce washbasins and sinks.

1931–1933

An innovative porcelain-like material is launched under the brand name KILVIT. KILVIT is much stronger than fire clay and the pieces come out completely white and dense.

1934

A factory is built to produce wall tiles from stone ware. Thus turning the "AG für keramische Industrie" into the first manufacturer of wall tiles in Switzerland and serving the national construction industry during the war years

1938

The production of wall tiles is followed by that of floor tiles. Another factory is built in LAUFEN to produce these floor tiles from stone ware. In a difficult business environment new jobs are created.

1949

After World War II, the Swiss Federal Railways, SBB, turns its attention to the electrification of the vast national railroad network. LAUFEN responds with the production of electro-technical porcelain – mainly insulators – and becomes a strong supplier of SBB.

1952

Within a short period of time, a new factory is constructed in Campo Largo, in the greater Curitiba region, by "AG für keramische Industrie LAUFEN" to also manufacture wall and floor tiles in Brazil. The company is registered under the name of INCEPA S.A.

1967

LAUFEN acquires the Vienna-based OESPAG (Österreichische Sanitär-Keramik und Porzellanindustrie AG) with its two Austrian production sites in Gmunden and Wilhelmsburg.

1970

The "Keramik Holding AG LAUFEN" is founded in response to the organisational structure needed to successfully guide the 4'000 employees at various locations in Switzerland, Austria, Germany, Spain and Brazil.

1971

The progressive development of the company necessitates new headquarters. The appointed architect is Giuseppe Gerster, a grandson of Joseph Gerster, who once founded the company.

1973

"On Saturday 3rd August shortly before 3:00 p.m. a fire had broken out in the floor tile factory belonging to the Tonwarenfabrik LAUFEN AG.

It emanated from the oil burner at kiln I. Despite the quick reaction with fire extinguishers, the fire was able to spread out, thus destroying the plant to a great extent." [Extract from the media]

1982

Ceramic pressure casting, developed by Keramik LAUFEN over years, is unveiled to the public for the first time in October 1982. A process which sets new standards for the sanitary industry, it enabled LAUFEN first to significantly boost its capacities, its efficiency as well as its range.

1986

Issue of 140 000 share certificates at CHF 650 each.

1990

LAUFEN focuses increasingly on design. Porsche Design is the first internationally renowned name to be consulted.

1997

From 1992 to 1997, the company went into debt through acquisitions and embarked on the restructuring of the group which had been due for years.

1999

LAUFEN becomes part of the ROCA group, and thus belongs to one of the largest and most influential enterprises in the bathroom and sanitary ware industry.

2002

In 2002 LAUFEN launched 'Tam Tam', the world's first standing washbasin, cast in one piece. The washbasin belongs to the design line ILBAGNOALESSI One by Stefano Giovannoni

2009

The LAUFEN Forum opens its doors. In addition, the Similar headquarters and production facilities are relocated to LAUFEN. This was the last step in the creation of the Swiss competence centre for bathroom culture in LAUFEN.

2013

With the innovation of "Saphirkeramik" LAUFEN presents a groundbreaking world novelty and sets a new standard for bathroom design.

2017

Keramik LAUFEN celebrates its 125th anniversary.

2019

LAUFEN developed a pioneering urine-separating WC with the design studio EOOS and the Swiss research institute Eawag.

2023

LAUFEN has installed the world's first electric tunnel kiln, producing products with zero carbon emissions, at its Austrian site in Gmunden.

2024

The Norwegian transdisciplinary studio Snøhetta has redesigned the LAUFEN Forum at our Swiss headquarters, introducing a new brand experience for visitors.

TODAY

LAUFEN manufactures and sells high-quality bathroom solutions including ceramic fixtures, faucets, bathtubs, furniture, mirrors, accessories and installation systems. The products are designed in collaboration with renowned partners such as design companies Alessi and Kartell as well as internationally renowned designers and architects such as Marcel Wanders, Patricia Urquiola, Konstantin Grcic, Stefano Giovannoni, Toan Nguyen, Peter Wirz and more.

LAUFEN – THE PRODUCTION

LAUFEN IS A SWISS COMPANY SPECIALISING IN SOLUTIONS FOR BATHROOMS SINCE 1892.

THE COMPANY'S HEADQUARTERS IS LOCATED IN LAUFEN, A TOWN NEAR BASEL WHICH IS ALSO THE HOME OF ONE OF ITS FIVE PRODUCTION SITES IN CENTRAL EUROPE.

LAUFEN HAS BEEN PART OF THE FAMILY-OWNED ROCA GROUP SINCE 1999 AND IS REPRESENTED WORLDWIDE IN MORE THAN 170 COUNTRIES.

Global network with local service

PRODUCTION SITES IN CENTRAL EUROPE

1 LAUFEN

The company is named after the town of Laufen near Basel in Switzerland where it has been manufacturing washbasins, bidets and toilets in sanitary ceramic since 1892. The management of LAUFEN, the training centre and the LAUFEN Forum are also located there, alongside the faucet production which was opened in a purpose built factory over 15 years ago.

2 Gmunden

Gmunden, Austria, has been a centre for ceramic production since the Stone Age, when the first clay vessels were crafted for salt extraction. For over 100 years, it has also been a key production site for LAUFEN where visitors can explore the factory on an immersive tour, showcasing the world's first electric tunnel kiln for the production of products with zero CO₂ emissions.

3 Bechyně

Bechyně is not only the home of the oldest vocational school of ceramics in the Czech Republic, it is also a modern factory where high-quality ceramics have been produced for more than 63 years.

4 Gliwice

LAUFEN ceramics products are produced in accordance with strict LAUFEN quality standards at the state-of-the-art Roca Group factory in Gliwice, Poland.

5 Gryfice

In addition, LAUFEN bathtubs are made of acrylic and mineral cast materials in Gryfice, Poland.

- LAUFEN branch
- Worldwide export

Swiss Quality

Products with the Q-Plus certification meet both the European standard and the established more stringent Swiss su-issetec/VSA standard.

LAUFEN sanitary ware products meet these Swiss quality standards and have been recommended for approval accordingly.

World's first electric tunnel kiln for the production of sanitary ceramics

Roca Group has invested in the world's first electric tunnel kiln for sanitaryware. In an effort to decarbonise the inherent energy and carbon-intensive production of ceramic goods, the company has taken a decisive step towards electrifying its production processes at its LAUFEN plant in Gmunden (Austria) thanks to the cutting-edge technology from Keramischer Ofenbau, world technology leader in the manufacture of ceramic kilns.

The LAUFEN plant in Gmunden, which already uses electricity from renewable sources, was chosen for the first implementation of this pioneering technology as it is particularly conducive to the manufacture of the latest products of the highest quality.

Given the kiln is highly efficient, decarbonised, and automated, it provides a valuable alternative to conventional production dependent on fossil fuels for Gmunden to become the world's first net-zero sanitaryware factory. This investment is also central to Roca Group's decarbonization strategy. Roca Group closed 2023 with a 50 % reduction in direct CO₂ emissions compared to the 2018 baseline, approaching its corporate ambition of net zero emissions by 2045.

LAUFEN – THE SUSTAINABILITY COMMITMENT

As a leading manufacturer of bathroom products, LAUFEN is conscious of its responsibility towards people, society and planet. That is why LAUFEN as a Roca Group brand/company supports the United Nations Global Compact, a worldwide pact between companies and the UN that aims to build stronger corporate sustainability practices for a sustainable and inclusive future.

LAUFEN's commitment to sustainable development, combined with the pressure on the planet's natural resources and the challenge of climate change, drives us to continually improve the environmental impact of our operations. This commitment is evident in every aspect, from carefully selected materials to thoughtful product design and production as well as optimized transportation methods to minimize our environmental impact.

By 2045, LAUFEN aims to achieve net zero emissions, primarily through measures to enhance energy efficiency across operations, accelerate electrification, replace carbon-intensive energy sources with greener alternatives, purchase certified renewable and engage with value chain partners fostering long-term collaboration for decarbonization.

Consolidated Key Environmental Performance Indicators (Roca Group)

Commitment

Environmental protection standards

Since 1998, LAUFEN has continually monitored the use of resources in all its internal and external processes. Targeted measures and appropriate investments promote the efficient and sustainable use of manufacturing resources. Important key environmental protection indicators show that LAUFEN production sites fulfil the legally-prescribed environmental protection standards, and in most cases also exceed them.

We Are Water Foundation

The We Are Water Foundation is an initiative of Roca Group established in 2010 with the aim of contributing to the solution of problems derived from the lack of water and sanitation around the world. LAUFEN is aware that water is a unique and limited resource and is partner of the We Are Water Foundation.

United Nations Global Compact

LAUFEN as a Roca Group brand/company supports the United Nations Global Compact, and works in line with the targets of the Sustainable Development Goals.

Roca Group achieved Gold Medal recognition from EcoVadis for outstanding sustainability performance.

As part of Roca Group's commitment to Sustainable Development, the company completes a thorough assessment of its business sustainability practices every year through EcoVadis, the global standard for business sustainability ratings. In the latest rating, which was completed

December 2023, Roca Group earned a Gold Medal and is placed in the top 3 % globally. The EcoVadis assessment includes 21 sustainability criteria across four core themes: Environment, Labor & Human Rights, Ethics and Sustainable Procurement.

World's first electric tunnel kiln for the production of sanitary ceramics

Roca Group has invested in the world's first electric tunnel kiln for sanitaryware. The company has taken a decisive step towards electrifying its production processes at its LAUFEN plant in Gmunden (Austria). Given the kiln is highly efficient, decarbonised, and automated, it provides a valuable alternative to conventional production dependent on fossil fuels and is a key milestone for Gmunden to become the world's first net-zero sanitaryware factory. This investment is also central to Roca Group's decarbonization strategy. Roca Group closed 2023 with a 50 % reduction in direct CO₂ emissions compared to the 2018 baseline.

Certifications

LAUFEN's production facilities are certified with the Environmental and Quality Management Systems ISO 9001 and ISO 14001. The internationally recognized ISO 14001 standard defines the requirements for an environmental management system, while the sustainable quality management in accordance with ISO 9001 ensures the consistently high quality of products and services. In 2007, we were also awarded the European Environment Prize for exemplary environmental management.

Unified Water Label

Many of our products are registered with the Unified Water Label scheme. This scheme identifies water-saving products that, when installed and used correctly, will use less water, saving energy and money. The Water Label is used across Europe for most bathroom products. Throughout our brochure, we have highlighted the faucets with the best water-saving performance, marking those that are "best in class" in terms of water efficiency.

EXAMPLE OF A UNIFIED WATER LABEL MARKING THE PERFORMANCE, WATER USAGE, ENERGY EFFICIENCY, AND SPECIFYING PRODUCT AND TECHNICAL DETAILS

LAUFEN – THE INNOVATIONS

Freedom to Reshape

**SAPHIRKERAMIK VERSUS
FINE FIRECLAY**

Saphirkeramik, patented and available on the market is a globally significant innovation from LAUFEN.

This revolutionary ceramic material reaches an exceptional hardness. This gives Saphirkeramik a flexural strength equal to that of steel. Yet it has the potential to be wafer-thin, giving designers almost infinite freedom to experiment – and tear up the rulebook of bathroom design.

After some years of experience of producing Saphirkeramik pieces on an industrial scale, LAUFEN is now stretching the patented material's limits by exploiting its super-fine forms not only to create exquisitely detailed textures and patterns but also by engineering the innovative material to increase its maximum size – a 120 cm-long washbasin in Saphirkeramik is the largest to date. LAUFEN has also applied its impressively efficient, high-pressure casting technology to, high-volume pieces in Saphirkeramik.

Design Preis Schweiz
Prix Design Suisse
Design Prize Switzerland

**design
preis
SCHWEIZ**

**THE THIN-WALLED SAPHIRKERAMIK
WAS TESTED FOR IMPACT RESISTANCE AT THE
KERAMIK INSTITUT MEISSEN**

Simultaneously hard and malleable, Saphirkeramik enables pieces to be made with very thin, yet very strong walls of only 3 – 5 mm, as well as with narrowly defined radii of only 1 – 2 mm. The slim profile of Saphirkeramik means that it saves space, is light and environmentally friendly. The new design characteristics of this innovative material are rooted in its exceptional hardness and strength.

**SAPHIRKERAMIK HAS A TWO TO
THREE TIMES HIGHER BENDING RESISTANCE
THAN TRADITIONAL CERAMICS**

When the mechanical properties of the two traditional sanitary ceramic masses – namely vitreous china and fine fire clay – are compared, the performance of Saphirkeramik is unique even in international comparison.

The comparative values measured by the Federal Institute for Materials Research and Testing in Berlin (BAM) for Saphirkeramik are, at an average of over 120 MPa; Comparable with carbon steel and twice as high as for vitreous china. LAUFEN was awarded the Swiss Design Prize 2017/18 for the development of Saphirkeramik.

“Aspects such as ecology and sustainability may not have been the focus of attention in the development of Saphirkeramik, but they contribute significantly to the positive overall image of the material,” the jury commented. In doing so, it acknowledged the additional advantages of the material: Lower material costs, for example, which are also due to a simplified structure of the ceramic parts, as well as the advantages in terms of environmental protection and sustainability, since fewer raw materials and less energy are used in the firing, production, and transport of Saphirkeramik.

**PRODUCTION OF SAPHIRKERAMIK WITH THE
CASTING TECHNOLOGY INVENTED BY LAUFEN**

„New materials have always been one of the most important driving forces behind the development of design. With Saphirkeramik, the traditional Swiss brand LAUFEN has succeeded in creating an equally surprising and remarkable innovation whose effects on sanitary ceramics can only be estimated to a limited extent today.“

BENDING STRENGTH

Source: Bundesanstalt für Materialforschung und Prüfung, Berlin, 2011

IMPACT ENERGY

Source: Keramik-Institut GmbH, Meissen, 2011

„The composite material, which does not require chemical additives, wows with its specific properties - hardness, bending strength - and offers the enormous economic advantage of being suitable for processing using traditional production processes.“ These were the words the jury used to elaborate on their decision to award Saphirkeramik the Swiss Design Prize.

save! smart sanitation for a sustainable future

INTEGRATED INNOVATION

Human urine is a rich source of phosphorus and nitrogen. These nutrients are valuable raw materials in the production of fertilisers used in agriculture. However, at present, the nutrients in urine often reach the natural waters directly, going through the wastewater treatment plants largely untreated.

When introduced into the water system, nutrients such as nitrogen and phosphorus do exactly what they do on land: they promote plant growth, contributing to algae bloom and, subsequently, to the formation of the so-called "dead zones". This has an impact on biodiversity and the health of marine systems, as well as on the economy, particularly fisheries and tourism.

In times of increasingly scarce resources and dwindling raw materials, it is well worth considering urine as a resource rather than letting it go wasted in the sewage system.

SOURCE SEPARATION TECHNOLOGY

If the waste streams are separated as soon as they are produced, they can be processed more sustainably in order to recover valuable resources, and wastewater management becomes part of the circular economy.

In addition to that, the effort required at the wastewater treatment plants is reduced immensely, as 1.5 litres of human urine currently contaminate approx. 180 litres of wastewater.

URINE TRAP

INVISIBLE INNOVATION

Together with Austrian design studio EOOS and the Swiss research institute Eawag, LAUFEN developed a ground-breaking urine separation toilet that opens a new chapter in sustainable wastewater management: "save!".

The key innovation in "save!" is the urine trap, created by EOOS Design. It uses the hydrodynamic principle of the tea-pot effect to conduct the urine towards a concealed outlet using only surface tension.

The intelligent design of the ceramic body ensures that the urine separation occurs irrespective of whether the toilet is used by a man, a woman or a child.

Rimless and wall-mounted, "save!" meets all industry standards and therefore compromises neither on comfort, nor on hygiene.

A NEW PARADIGM

THE VISION

The installation of urine separation toilets into hotels, public areas and residential developments will lead to sustainable and energy-saving waste-water management, seamlessly integrating a circular economy by efficiently treating the collected wastewater, recovering and recycling the preserved nutrients.

TRANSFORMATIVE CHANGE

World's first electric tunnel kiln for the production of sanitary ceramics

Roca Group has invested in the world's first electric tunnel kiln for sanitaryware. The company has taken a decisive step towards electrifying its production processes at its LAUFEN plant in Gmunden (Austria). Given the kiln is highly efficient, decarbonised, and automated, it provides a valuable alternative to conventional production dependent on fossil fuels and is a key milestone for Gmunden to become the world's first net-zero sanitaryware factory.

LAUFEN – THE DESIGNERS

Andreas Dimitriadis

Andreas Dimitriadis is the German designer of the timeless PALACE bathroom suite. After founding his studio platinumdesign, Dimitriadis worked with LAUFEN to develop the first Saphirkeramik products to be produced on an industrial scale as part of the LIVING collection and also designed a number of other products including the vibrant and playful FLORAKIDS.

SONAR bowl washbasin 34; drawer element Kartell • LAUFEN concealed basin mixer FRAME 25 mirror round

SONAR

DESIGN BY PATRICIA URQUIOLA

Patricia Urquiola exploits the fineness of LAUFEN's Saphirkeramik. The designer uses the probably biggest material evolution since the invention of the ceramic material for spectacular elegance in the SONAR series. Accentuated geometry and sensual textures draw a dimension that stimulates even the water to new momentum.

IL BAGNO **ALESSI**

DESIGN BY STEFANO GIOVANNONI

IL BAGNO ALESSI is a bathroom design that has cast its spell over the home design world for years: It is characterised by a timeless form, sparkling imagination and a hint of eccentricity. This design award-winning ensemble is the creation of Italian designer star, Stefano Giovannoni.

Kartell • LAUFEN

DESIGN BY LUDOVICA+ROBERTO PALOMBA

Ludovica and Roberto Palomba continue to play off the strengths of the Kartell • LAUFEN range of icons with the greatest of ease, lending physical form to the endless options available by combining colours, forms and surfaces. New washbasin creations of this design classic in an extremely compact form and created from revolutionary Saphirkeramik. For your own freedom in bathroom design. For decisions with sense and feeling. For an unparalleled amount of space. For tangible quality that leaves nothing to be desired.

THE NEW CLASSIC

DESIGN BY MARCEL WANDERS

A collection of perfectly shaped innovations for the bathroom. THE NEW CLASSIC radiates the practicality of the harmonious form and combines it with contemporary style. A clear formal expression of modern elegance comes into being which celebrates the bathroom as a place of cleanliness and purity. The awardwinning technological quantum leap of Saphirkeramik turns every piece into a witness of progress.

THE NEW CLASSIC Vanity washbasin 80 with washbasin frame; ceramic mirror with LED ambient light; Ceramic tooth brush holder; Soap dish; 3-hole basin mixer; Wall-hung toilet

INO vanity washbasin, shelf right; vanity unit; freestanding bathtub
Kartell • LAUFEN wall-mounted basin mixer with tray; column bath mixer; stool 'Max Beam' FRAME 25 mirror

DESIGN BY TOAN NGUYEN

INO, the bathroom collection designed by French designer Toan Nguyen, understands itself as a fresh interpretation of classic washbasin forms. The innovative collection skilfully uses the creative possibilities of LAUFEN's Saphirkeramik. Elegant, inviting and almost weightless objects, the pieces work with simple lines, creating soft yet extremely stable walls. The collection includes a wall-mounted washbasin, a countertop or half inserted washbasin bowl, as well as high-quality bathroom furniture and two bathtubs.

VAL washbasin 100; wall-hung WC „rimless“; freestanding bathtub Ø 130 PURE basin mixer; set for concealed single lever bath mixer; wall-mounted spout FRAME 25 mirror INEO flush plate SUNRISE

DESIGN BY KONSTANTIN GRČIČ

A material that offers new possibilities, a designer, who pursues new ways, a connection that creates new worlds. For a bathing experience that awakens unknown emotions. With his evolutionary designs, Konstantin Grcic architecturally stages the revolutionary Saphirkeramik from LAUFEN, thereby completing the bathroom collection VAL. Clear geometric lines, extremely narrow edges and finely textured surfaces united in harmony, open up a unique category of bathroom culture.

MEDA

DESIGN BY PETER WIRZ

Peter Wirz draws on the classic virtues of Swiss design: clarity, functionality and attention to detail. The result is MEDA – a universal bathroom collection that feels familiar from the first moment and blends into any environment, from rental apartments to hotel suites. The series offers a complete bathroom as a characterful unit, with a comprehensive range of ceramics, furniture, bathtubs and faucets in a timeless design language. With glossy and matt colour variants for washbasins and toilets, PVD coating options for faucets, and more than 40 painted surfaces for furniture, MEDA complements any interior design style and leaves nothing to be desired.

LIVING bowl washbasin round Kartell • LAUFEN column basin mixer

LIVING

DESIGN BY ANDREAS DIMITRIADIS & PHOENIX

A system with corners and edges yet so flexible and easy to maintain: LIVING has a clear concept and clear forms. The modular system offers washbasins with and without shelves in many widths. Extremely flat elements with their smooth surfaces and defined edges literally float in front of the wall bearing witness to an unparalleled fusion of elegance and bathroom culture. Large areas are cleverly hidden behind narrow silhouettes defining a functional wash place as the centre of the bathroom. Reduction and individualism without peculiarity: LIVING's formal language is aimed at people who appreciate a contemporary setting and design their surroundings with sensitivity and a great sense for materiality.

PRO S Combipack 800 mm, washbasin ‚slim‘ with vanity unit ‚Base‘

LAUFEN PRO S

DESIGN BY PETER WIRZ

With lots of sensitivity Peter Wirz brought about a systematic, production-optimised evolution of the PRO concept: Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant, appearance. The deep bowl means that it's also functionally appealing. The aesthetics of LAUFEN PRO S therefore definitely take the range in the direction of LAUFEN's premium design lines – while remaining affordable by all.

Matching tall cabinets can be found in the BASE chapter. Other furniture can be found in the JUNA / BASE 2.0 / BASE chapters. Matching mirrors and mirror cabinets can be found in the FRAME 25 / LEELO / LANI / ILON chapters. Matching shower toilets can be found in the CLEANET SHOWER TOILETS chapter.

LAUFEN PRO freestanding bathtub Kartell • LAUFEN column bath mixer ,disc'

LAUFEN PRO

DESIGN BY PETER WIRZ

LAUFEN PRO is a comprehensive bathroom range, which offers the ideal solution for every spatial situation and requirement and also reflects the building values of the current generation. Industrial design is the modern answer to the once revolutionary idea that everyone has a right to enjoy beautiful forms. Good design is now no longer a right reserved for the most affluent customers. Modern methods of industrial production and designers such as Peter Wirz of Vetica, who put optimum manufacturing feasibility at the forefront of their creative processes, make such sanitary ware ranges as LAUFEN PRO possible. This does not just benefit the designer, more importantly, it also benefits the customer.

DESIGN BY TOAN NGUYEN

A design language that has been reduced to the essentials. Clear, geometric lines united in one continuous form, This results in a versatile bathroom programme for private and public architecture alike. With LUA, Toan Nguyen has succeeded in creating yet another stylistic bathroom culture that will be a long-term common denominator. The collection of fittings designed with the same ambition, perfectly shaped bathtubs and the extensive LANI furniture range complete LUA are turned into a true total bathroom solution.

FLORAKIDS washbasin 'cloud' CURVEPRO basin mixer

FLORAKIDS

DESIGN BY ANDREAS DIMITRIADIS

FLORAKIDS from LAUFEN is imaginative, colourful and playful – a bathroom that children are sure to enjoy. The centrepiece of FLORAKIDS is a washstand with a basin in the shape of a flower blossom, available in white, red or green. In kindergartens, several washbasins can be lined up in a series to create plenty of space to put things. To complement the washbasin, you can add ceramic shelves, shaped like little clouds in matching colours. Mirrors are available in red mirror flower, or green mirror caterpillar designs and consist of separate mirror elements that can be lined up in series.

CLEANET SHOWER TOILETS

ENHANCING EVERYDAY HYGIENE

The epitome of Swiss reliability and quality with the CLEANET collection of shower toilets. With neutral design that harmoniously integrates with our design lines, the CLEANET collection offers a range of high performance functionality. Always concealed behind elegant aesthetics. With simple operation and maintenance, plus a comprehensive range of options, CLEANET embodies the realisation of advanced design.

PERFECTLY COMFORTABLE

The Cleanet shower toilets blend seamlessly into any bathroom interior with their timeless ceramic body. This means increased design quality, thanks to the familiar aesthetics, as well as improved quality of living, thanks to intimate washing with pure water.

EASY TO USE

The great feeling of freshness and cleanliness, always within reach: the rotary button on the Cleanet shower toilet enables easy and intuitive use of the many shower functions. Turn and press – hygiene can be that easy. Additional functions and settings can be accessed via remote control or app.

THOROUGHLY CLEAN

The Cleanet shower toilets offer all-round optimum hygiene and cleanliness. The multi-level hygiene concept ranges from the basic shower functions, to self-cleaning after every use, all the way through to simple maintenance cleaning and automatic descaling.

CLEANET RIVA

Pure theory takes shape - in the form of a flawlessly designed unit featuring a technically advanced interior. The visionary concept is apparent in the strikingly sensitive design of this incomparable shower toilet, which boasts an intuitive stainless steel control system. Thanks to its patented technology, this design takes the holistic approach - incorporating design, comfort and hygiene - to an entirely new level, and has been rewarded with the most prestigious design awards.

Design by Peter Wirz.

CLEANET RIVA shower toilet SONAR washbasin 40; vanity unit

Minimalist compact design similar to a standard toilet

The exchangeable shower head is lowered into the ceramic body with a cover ring

CLEANET ALVIA

The all-inclusive shower toilet, for the ultimate in wellness & hygiene; highly personalised showering, soothing drying function, heated seat, UV & water disinfection and more for an ultra-modern bathroom experience. Installation is impressively simple with the innovative integrated water tank option allowing you to elevate your hygienic practices quickly and easily.

CLEANET ALVIA shower toilet

CLEANET ALVIA shower toilet

CLEANET ALVIA shower toilet

EASY ACCESS
Integrated lateral control panels on both sides provide easy access to basic functions.

POWER SAVING
Automatic power saving efficiency mode based in the real use of the CLEANET ALVIA.

REAR, INTENSE AND LADY SHOWER
Configurable multi-stream rear, intense and lady shower to suit personal wash mode preferences.

HIGH-EFFICIENCY AIR-DRYER
The Coanda effect directs airflow to specific areas, ensuring optimal efficiency and effectiveness. This aerodynamic phenomenon, where air flow follows the surface of the ceramic, enables fast and effective drying.

AUTOMATED FLUSH
The floor standing version offers both full and half flush options. It can also be configured for a pre-flush when the user approaches as well as a full or half flush after each shower function.

AIR PURIFICATION
Activated upon user detection, ensuring a fresh and pleasant environment.

CUSTOMISED SETTINGS
Customised Settings via remote control or app (LAUFEN SMARTCONTROL)

SEAT HEATING
Adjustable heating to suit personal preferences, with an evenly distributed heat, which can also be scheduled through the app.

BARRIER-FREE BATHROOM

DESIGN BY PETER WIRZ

LAUFEN PRO LIBERTY / LIBERTY LINE / REHAB

Liberty: highly prized in our society, but also, increasingly, a basic need in bathroom design. With his answer to the demand of barrier-free comfort, Peter Wirz proves that the legendary LAUFEN PRO bathroom series knows no limits - even when norms apply.

BARRIER-FREE BATHROOMS

Standards 18024 and 18025 define the requirements which bathrooms and toilets need to receive in order to be certified "DIN barrier-free". The LIBERTY LINE range has been certified as "DIN barrier-free" and includes a wheelchair-compatible washbasin without overflow hole and a concealed siphon. The toilet, which must be be at least 5 cm higher, has a projection of 70 cm and can be wall-mounted using existing connections.

THE UNOBSTRUCTED BATHROOM

Demographic change has brought the needs of older people to the fore. At the same time, it has become clear that planning is beneficial for all generations. In general, a barrier-free bathroom provides greater safety and comfort and is an investment for the future. As a rule, virtually all LAUFEN products are suitable for a bathroom for all age groups. Depending on the place of use and target group, however, particular regulations and guidelines must be adhered to.

Planning for all ages and apartments for the elderly

Planning for all ages means creating value for everyone. A bathroom for every age is characterised by a generous, floor level shower with easy-to-operate faucets and shower sliding bar, a washbasin which is suitable for wheelchair access with ergonomic faucets and a toilet mounted at 0.46 m (upper edge of toilet seat).

Toilets in public buildings

For the planning of public toilets, for example restaurants, office buildings, shopping centres or sports facilities, certain norms have to be adhered to. They define the exact fitting and positioning.

Retirement and care homes

In retirement and care homes, rooms and showers must be generously planned in order to enable people with mobility difficulties to independently care for themselves. For the care of people with disabilities or overweight people two caregivers should also be able to access the bathroom and shower.

TOILET

The toilet should generally be mounted at a height of 0.46 m (upper edge of toilet seat). Placing it in the corner of the bathroom with a centre distance of 0.45 m - 0.50 m will enable the installation of an L-shaped handle on the lateral wall. Toilets in public buildings sometimes require a projection of at least 0.65 m. This can be achieved with an extended LIBERTY toilet, a wall-mounted toilet or a standard concealed toilet on a short front wall installation.

FAUCETS

The longer the lever of the faucet the less force is required to operate it. Various series of Laufen faucets can be re-fitted with a longer handle at a later stage. Contact-free fittings require no use of force and are also suitable. In the shower a concealed faucet is recommended. This facilitates the use of the close handle.

INEO INSTALLATION SYSTEM

INSTALLATION SYSTEM FOR HOLISTIC AND EFFICIENT BATHROOM DESIGN

With the INEO installation system, LAUFEN takes its renowned quality and innovation behind the wall, establishing a new benchmark for sanitary installation systems. Accompanying the INEO system, a broad selection of flush plates, both mechanical and smart options, are available. These plates, the visible and tangible elements of the product, enhance the aesthetic of the bathroom with a variety of premium designs, colours and materials, designed to suit all LAUFEN bathroom collections and customer preferences.

The advantages are clear: architects, planners, installers and customers, can significantly reduce their design and installation effort, thanks to the entire bathroom now being supplied from a single source with LAUFEN.

INEO

A PREFAB installation wall, using INEOLINK elements and INEOGRID structural components

INEOLINK H920115 includes all points to connect LAUFEN CLEANET shower toilets

INEOLINK concealed cistern and frames, reinforced for accessible installations.

PERFECTLY COMBINED INNOVATION, EFFICIENCY AND DESIGN

INEO makes installation easy for both new build and renovation, even for the most challenging project requirements. It contains products and services for single installation elements with INEOLINK, available for pre- and brick-wall installation, as well as the full dry wall building system INEOGRID. Additionally, architects and planners can utilise PREFAB, the comprehensive prefabrication service with planning support.

All INEO concealed cisterns, frames and components are carefully engineered and manufactured in our production site in Germany, to the highest level of industrial quality. For ease of installation, most adjustments can be carried out tool free. Not only does this speed up the installation process, it also reduces the risk of errors whilst allowing for fast and simple maintenance, where necessary.

ARUN

NATURAL MATERIALS AND WARM COLOURS

Introducing ARUN by LAUFEN: a masterful blend of natural materials and warm, evocative tones harmoniously redefine the modern bathroom as a place of serenity and personal retreat. Drawing inspiration from the quiet embrace of the early morning sky, ARUN merges the unique characteristics of wood and stone textures with over 40 refined lacquer finishes, creating an innate elegance where nature meets craftsmanship. With its timeless design and sustainable production, ARUN embodies a union of function and style that radiates sophistication.

LUA Washbasin 100; Basin mixer LANI Vanity unit 100; Wall cabinet 100 LEELO Mirror with LED light 100

DESIGN BY TOAN NGUYEN

With its slender and timeless design, the LANI furniture series, which is as practical as it is aesthetic, harmonises perfectly with LUA. It can also be making well thought-out storage solutions possible for both new and existing bathroom concepts with tried-and-tested washbasin objects. The all-rounder LANI inspires not only with its formal quality - Functional refinements are also built in, creating bathroom furniture that is more than the sum of its components.

BASE 2.0

TIMELESS DESIGN AND PURISTIC AESTHETICS

Evolving a classic – a subtle restyle to a timeless design, maintaining its signature appeal while enhancing its versatility and puristic aesthetic. Rounded corners, integrated J-type handles and anthracite interiors create a refined, seamless look, while full extension drawers with soft-close and a handy drawer organizer ensure practicality. Available in a wide range of finishes, including over 40 colour options, BASE 2.0 is the perfect companion for PRO S and VAL ceramics, offering a robust yet personalised solution for any bathroom style.

LEELO mirror 45 with LED light and touch sensor

INO vanity washbasin 90, shelf left, matt Kartell • LAUFEN basin mixer FRAME 25 mirror

FRAME 25

MIRRORS / MIRROR CABINETS / GLASS SHELVES

Timeless elegance is expressed in the FRAME 25 mirrors. They are impressive with their crystal-clear reflection, essential when putting on make-up, for skin care, or shaving. They are protected by a narrow, gloss anodised aluminium frame with cleanly defined edges.

NIXIE

The timeless interplay of contrasting colours transcends the bathroom, allowing designers to create a striking chromed ambience or alternatively monochromatic ethereal spaces with matt finishes in Black and White.

Exclusively featuring a screw fixing for a secure installation, this collection delivers both style and affordability and has been built to last, successfully passing high demanding tests for durability and resistance to extreme uses to assure the longevity of the product. Explore the transformative power of classic contrasts with NIXIE.

HOME COLLECTION

SMALL SCULPTURES FOR YOUR DAILY DELIGHT

The HOME COLLECTION brings Saphirkeramik into other rooms of the house for the first time. The range includes objects and accessories, which resulted from the collaboration with internationally renowned designers, and of the ongoing dialogue with the world of art and design that LAUFEN has always supported. Small sculptures decorate not only the bathroom, they can also add an elegant and original touch to other rooms in the house.

YOUR NATURAL COMFORT ZONE

The force of nature is unexpectedly conjured up in a solid surface bathtub. With the high proportion of mineral particles, the surface feels as smooth as stone which has been rounded and polished over time by gently flowing water. The pleasant, warm touch of the surface conveys a feeling of health and cleanliness - providing pure relaxation.

STEEL BATHTUBS AND SHOWER TRAYS

PURE, PROVEN AND RESISTANT

There are not many things that will last a lifetime. With bathtubs and shower trays made of heavyduty, enamelled steel, LAUFEN however creates a pleasant feeling of eternity. The products present themselves in their most beautiful designs as being dimensionally stable, scratch, impact, and abrasion-resistant.

LUA freestanding bathtub

MARBOND BATHTUBS AND SHOWER TRAYS

SILK MATT AND PLEASANTLY SOFT

Marbond is a robust composite material, made of two layers with a high-strength bond between them. It is based on a high quality solid surface material with a robust gel coat finish. The smooth, anti-bacterial surface hardly attracts any dirt, thus makes it easy to clean. Marbond is UV and chemical-resistant according to DIN EN 14527, thermal shock resistant according to DIN EN 14527, has an anti-slip surface = high slip security (DIN 51097, Class C), and is certified according to noise protection standards SIA 181 and DIN 4109.

Marbond is available in white, while the collection PRO is also available in light grey, anthracite, concrete and black, and PRO S in anthracite and concrete. In addition, the composite material can be cut to size, and a repair set is available in case of damages, for example scratches.

ILBAGNOALESSI washbasin and Kartell • LAUFEN washbasin mixer

FAUCETS

SOPHISTICATED AESTHETICS AND FUNCTION

As a supplier for the complete bathroom, LAUFEN offers a broad portfolio of faucets for bathrooms and public bathrooms with sophisticated aesthetics that are convincing in terms of surface finish, quality, functionality and economical consumption.

LAUFEN's faucets offer tangible benefits for the user, as they are matched in design and handling to the company's washbasins, showers, and bathtubs. In this way, bathroom scenarios can be realised whose design language is coherent and consistent down to the last detail. Faucets are offered in trendy colors such as black or black matt and are also available in gold, rose gold or in a brushed, matt look, thanks to a new PVD coating process. PVD stands for "Physical Vapor Deposition", a process in which metallic surfaces are coated with an ultra-thin crystalline layer, comparable to a layer of glass on a metallic substrate. The coated product is twice as scratch-resistant as normal chrome-plated products, highly durable and very easy to clean.

LAUFEN faucets represent an example of longevity of materials and are characterized by ergonomic handles and ensure precise adjustments of the water flow rate and temperature, providing modern energy saving solutions. Furthermore, LAUFEN faucets are equipped with durable and low maintenance cartridges with Eco or Eco+ function.

FAUCETS

LAUFEN STANDS FOR QUALITY & DESIGN

DESIGN AND DEVELOPMENT

THE COMPANY PROVIDES COMPLETE SOLUTIONS FOR BATHROOMS RIGHT AROUND THE WORLD.

TOOL-MAKING SHOP

EXPERTISE IN FAUCETS SINCE 1854

Very aware of the power and significance of water as an element, LAUFEN is committed to true aesthetic beauty: We give water a shape to enable it to pamper body and soul.

CASTING SHOP

In 2007, ROCA acquired the oldest faucet factory in Switzerland – Similor AG – and since then has been a subsidiary of LAUFEN. This has enabled the company to complete its product range as a complete bathroom provider. For the last 160 years, the employees have drawn their inspiration from the element of water, and their endless stream of innovations turn bathroom faucets into an artwork form.

MACHINING (CHIP-CUTTING) SHOP

FROM HOT IDEAS TO COOL FAUCETS

GRINDING SHOP AND POLISHING SHOP

What takes place during the concept and planning phases, and what often heats heads to steaming point, gains its ultimate expression at temperatures approaching 1000 degrees Celsius. Production is now in progress, launching the history of a new faucet. Beholding beauty at all times, we accompany it from station to station, until it achieves its ultimate form.

SURFACE TREATMENT SHOP

PVD is a finishing technique where a solid material transforms into vapor to coat another material. LAUFEN uses the PVD process to give faucets and metallic accessories coloured surfaces. The PVD surface is a thin-filmed, robust and outstanding high-quality coloured coating. The long-term quality is significantly better than with lacquered surfaces as it makes faucets twice as scratch-resistant. Additional benefits are that the colours do not fade even in direct sunlight and the surfaces have an anti-fingerprint effect, offering enhanced durability and improved corrosion resistance. As the colour layer adheres to the metal at an atomic level and is inseparably bonded to the fitting, the surface remains permanently beautiful. LAUFEN provides a full range of individual colour selections which are standardised, and compatible with different LAUFEN products.

PHYSICAL VAPOR DEPOSITION (PVD):
ENHANCED SURFACE FINISHING

FUNCTION TESTS

And at the place where ultra-modern machines reach the limits of their capabilities, that's where we encounter art once again: in the faucet finishing shop. Because pure craftsmanship is what people want.

FINAL ASSEMBLY AND PACKAGING

Kartell • LAUFEN column bath mixer

ADA basin mixer ILBAGNOALESSI washbasin shelf right FRAME 25 mirror round

ELEGANT, VERSATILE AND
ALLURINGLY PRACTICAL

Faucets from ADA stand out for their integrated trays and combination of function and aesthetics. The trays are available in different designs that blend seamlessly into a variety of bathroom styles. Practically positioned, the trays offer a convenient solution for keeping soap or decorative items within easy reach, without the need to install additional trays or shelves.

ILBAGNOALESSI washbasin ADA basin mixer

THE NEW CLASSIC single lever basin mixer; small washbasin 50, undersurface ground; ceramic soap dish and mirror with LED ambient light

THE NEW CLASSIC

DESIGN BY MARCEL WANDERS

Maximum functionality and a playful approach with distinctive lines. The proportions of these faucets are perfectly integrated in line for an unobtrusive yet exciting manner. A well-balanced whole comes into being which creates the feeling of tranquility you expect from a modern bathroom. Wanders' allembicing artistic concept of THE NEW CLASSIC sets its sights on consummate aesthetics in the bathroom – and this presupposes the artistic interaction of the interior.

MEDA basin mixer; vanity washbasin; vanity unit FRAME 25 mirror round

MEDA

UNIVERSAL DESIGN FOR EVERY
SPACE, EVERY INDIVIDUAL

MEDA faucets combine slim, cylindrical bodies with a wide spout and matching handles, which draw on the oval shape of the washbasins. MEDA offers a comprehensive range of elegant and highly functional faucets for washbasins, bathtubs, showers and bidets, which pair timeless design with the latest technology and fulfil the highest standards in functionality and quality.

LAURIN single lever basin mixer INO washbasin

LUA Single lever basin mixer

A DESIGN COMPANION, WITH CLEAR GEOMETRIC LINES

The LUA bathroom collection is accompanied by a comprehensive range of faucets designed by Toan Nguyen that matches the design language of the other bathroom objects in the series: The series offers solutions for washbasins, bidets, bathtubs and showers that provide water comfortably and hygienically and in a way that saves energy and costs. The slim, simple shape of the water dispensers with the curved spout and restrained lever blends in just as harmoniously with other bathroom collections and makes the LUA fittings a pleasant companion in everyday life.

SIMIBOX

Three boxes, many advantages

The concealed Simibox system combines ingenious technology and easy handling with high design standards. Choose the Simibox Standard with integrated stop valves and reversible supply and outlet pipes or one of the simpler Simibox Light versions, depending on the local conditions.

SIMIBOX Light with stop valves
HF 574037000000

		Recess depth	With stop valves	Positional correction up to 5°	Supply and outlet connections reversible	Fits mechanical pre-assembled sets	Fits thermostatic pre-assembled sets	Pre-assembled set can later be exchanged/ replaced
	SIMIBOX Light HF 574038000000	min. 74 mm				✓	✓	✓
	SIMIBOX Light HF 574037000000	min. 74 mm	✓			✓	✓	✓
	SIMIBOX Standard HF 574007000000	min. 102 mm	✓	✓	✓	✓	✓	✓

Integrated stop valves
Just turn two screws and the water stops. The local stop valves facilitates any necessary service quickly and easily without having to turn off the water in the entire building.

Simple positional correction after installation by up to 5°
If the box is not installed exactly level, the functional box of the Simibox Standard can later be adjusted by 5° on both sides.

Flexible
The connections for the supply lines and mixed water outlets can easily be reversed on the Simibox Standard.

Cutting-edge technology behind the wall means nothing without attractive packaging to round it off. The high-quality design of our concealed mixer perfectly complements the shower and bath experience. The pre-assembled kit is made up of the functional unit, together with the corresponding decorative elements, and is available to match all our design ranges. If new forms are required, a replacement is possible in next to no time. Whether you are looking for classical elegance, futuristic boldness or everyday simplicity – LAUFEN concealed mixers have something for every taste.

TWINTRONIC electronic concealed basin mixer with IR sensors

Infra-red controllers - flexible technology for all needs

The future of the faucet: contactless, hygienic, vandalproof, and efficient. Infra-red technology can save up to 70% water compared to conventional faucets and the easy-to-clean shape makes it very hygienic. Ideal for public and semi-public installation: Low consumption and maintenance costs even during maximum use. Ideal for hospitals, sport arenas, schools, airports, railway stations, gyms and restaurants.

The water flow starts as soon as your hands enter the detection area.

TWINTRONIC

DIGITAL PUBLIC BATHROOM – HYGIENIC AND EFFICIENT

The TWINTRONIC concealed solution facilitates particularly space-saving design for public washrooms. TWINTRONIC can be installed with the Simibox Standard & Simibox Light concealed system.

PRODUCT FEATURES AND BENEFITS – SANITARY WARE

Sanitary ware production: Tradition and innovation

The basic ingredients for making ceramics have always been naturally occurring raw materials: Kaolinite, clay, feldspar and quartz sand form the basis for this extremely durable and hard material. The individual components of this malleable material are combined, homogenised and cleaned as part of a unique and very protracted process at LAUFEN. The resulting slurry – the pourable starting material for ceramics – is poured into pre-prepared plaster moulds or shaped using a special pouring process developed at LAUFEN. The formability and pourability of the material allows the creation of a wide variety of sanitary ware products, but nevertheless always poses a manufacturing challenge, especially when creating objects with complex geometries.

Dried and glazed blanks are then baked in a kiln at temperatures up to 1240°C. Such extreme kiln temperatures ensure the hardness and durability of our high-quality LAUFEN products.

Ceramics, through their smooth, easy-to-clean surface, fulfil the highest hygiene standards – chemical acids, strong cleaning fluids or hydrochloric compounds hardly affect the material. Due to its light fastness, versatility and pleasant appearance, ceramic is the most popular material used to manufacture high-quality sanitary fittings.

Top recycling qualities

Ceramic is the oldest malleable material used by mankind – and consists exclusively of naturally occurring raw materials. Ceramic is 100% recyclable and can be reintroduced into production processes as a ground powder or reused as a valuable raw material in other industries.

Ceramics or synthetic materials

Ceramic is the material which has been traditionally used in the bathroom over the centuries – and with good reason. The superiority of the material is evident, particularly in terms of hygiene, useful lifetime, environmental compatibility and durability. However, washbasins made of plastics and mineral-based cast materials are also available on the market, which present a design challenge to producers of sanitary ware. LAUFEN has always had a reputation as an innovator in the sanitary sector and is always striving to improve the materials and production techniques it uses. As a result of these efforts, new ceramic compositions have been developed that allow smaller tolerances and even more precise corner radii or large flat ceramic items. Made to measure washbasin solutions ensure that ceramic sanitary ware can be fitted with millimetre precision into bathroom floor plans. Ceramics therefore deliver outstanding performance in all respects.

Saphirkeramik: A revolution in the formal language of ceramics

The innovative and high-quality composition of Saphirkeramik bestows possibilities and versatility never seen before upon the base material, enabling exceptional shaping. Edge radii of 1–2 mm are thus technically feasible. The new type of ceramic is considerably harder and has an improved bending strength. LAUFEN is thus able to produce thinner ceramic bodies, which reduces weight and the consumption of raw materials and energy. Saphirkeramik is not a replacement for any of the existing materials; instead, it broadens the range of forms of expression of the natural base material.

LCC LAUFEN Clean Coat

The surface finish LAUFEN CLEAN COAT is a silicate ceramic vitreous coating baked on over the original glaze. With a coarseness value of 4 nanometer, LCC-enhanced surfaces are much smoother than conventional coatings. The benefits of this advanced process are considerable. The surface glazing, as an inseparable

part of the ceramics, besides being immaculately smooth is also exceptionally hard and therefore practically indestructible. Grime, limescale and bacteria don't stand a chance on the pore free surfaces and are, thanks to the hydrophilic LCC ceramic, simply rinsed away by the running water. This takes the effort out of cleaning and ensures the highest standards of cleanliness and hygiene on a permanent basis. Cleaning agents and disinfectants are also spread more easily and thus more efficient. Even after years of use, the sanitary ware remains smooth and shiny, just as it was when it was brand new, in private bathrooms and public and semi-public areas.

LCC
Active

THE NEXT LEVEL OF HYGIENE AND SUSTAINABILITY

LCC Active is an advanced ceramic coating technology developed by LAUFEN that enhances the cleanliness and hygiene of bathroom ceramics. A natural evolution of the original LCC, which has ensured easy cleaning for years, LCC Active takes hygiene to a new level. The innovative surface treatment offers optimum protection for the ceramic, preserving its natural beauty and radiant shine for many years, while actively protecting against harmful bacteria and viruses.

LCC Active works by sealing even the tiniest of pores in the ceramic glaze, resulting in an ultra-smooth surface with a roughness of just 0.00001 millimetre, three

times smoother than conventional glazes. The inorganic silicate-based material gives a superior smoothness, minimising the adherence of dirt, limescale, and germs, making it easier for water to wash them away. Simultaneously, LCC Active significantly reduces bacteria and viruses, thanks to the biocidal agent Copper. The hydrophilic surface also enhances the distribution and effectiveness of cleaning agents, allowing for the use of gentler, more environmentally friendly cleaning products.

Concealed overflow

This alternative to standard overflows for washbasins and bidets, has many benefits. Thanks to our overflow system which is invisible from the outside, our washbasins and bidets no longer have a visible overflow hole, which not only improves the appearance of the product, it also makes cleaning much easier. The clean and aesthetic innovation works quite simply: Water rises in a concealed internal channel in parallel with the water inside the washbasin and overflows into the run-off when the water reaches the maximum level.

EasyFit 2.0 fixation system

ATTACH, TIGHTEN: INSTALL WALL-HUNG WCS IN RECORD TIME WITH EASYFIT 2.0

With EasyFit 2.0 mounting system, all assembly steps are consistently optimised for simplicity and accuracy, and just one sanitary fitter can now install wall-hung WCs extremely quickly and easily – no assistance is needed. The WC comes with just a few mounting parts which can be

installed very fast, cutting down the overall installation time for WC ceramics with EasyFit 2.0 to record levels. Especially on large-scale projects with many sanitary units, this can save a lot of time, effort and personnel – and reduce costs. The prefabricated mounting rods are made of fibreglass-reinforced plastic and do not have to be specially cut to length on the construction site – this saves work time, prevents measuring errors, and also avoids a lot of plastic waste which, LAUFEN has calculated, can add up to around 24,000 linear metres per year.

Comfortable lowering system

Thanks to our convenient lowering system many of our WC covers and seats close gently and quietly. For easier cleaning, all LAUFEN seats can be removed with a simple hand movement. LAUFEN seats have been comprehensively tested: amongst others the test includes opening and closing 50,000 times.

PRODUCT FEATURES AND BENEFITS – SANITARY WARE

Vario Outlet

MAXIMUM WALL CLEARANCE FOR
VERTICAL FLOOR OUTLET

MINIMUM WALL CLEARANCE FOR
WALL FLOOR OUTLET

HORIZONTAL WALL OUTLET

The installation dimensions of WCs are not always identical: In many renovation situations the LAUFEN Vario outlet can make it easier to connect the WC to the sewage network. Both horizontal and vertical outlet wall clearances of up to 305 mm for washdown are possible.

Without flushing rim

Most of the bowls of the new LAUFEN WCs are rimless. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both the 6/3-litre version and the 4.5/3 litre version. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

Silent Flush WC The new acoustic discretion

LAUFEN's new Silent Flush technology minimizes noise for the sake of family and neighbours. The new function has been introduced with the wall-mounted toilet of the new MEDA and Kartell • LAUFEN collection. Admittedly, the sound of flushing may not be one of the most important decision criteria. However, after design, comfort, hygiene and durability, it is indicative of the quality of the toilet in everyday life: Silent Flush ensures even more privacy and quiet nighttime trips to the bathroom.

The innovative technology flushes the water powerfully yet quietly in an optimized spiral path through the toilet bowl. Water consumption is reduced, and bathroom hygiene improved. The dynamic water vortex flushes the rimless toilet perfectly clean with as little water as possible. The new function remains invisible on the outside: The use of Silent Flush does not change anything about the familiar design of the toilet. Enjoy the silence.

Water saving WCs

The latest generation of LAUFEN water-saving WCs are optimised to a full flushing volume of 4.5 litres of water. Compared to today's 6/3 litre Dual-Flush these models provide substantial water savings. With an average of 5,000 flushes per WC per year, the yearly water saving is at least 6,000 litres, or more than 27,000 litres if we take into consideration that 9 or even 12 litre models are still in use. LAUFEN WCs marked with the green 4.5/3L logo are not only fulfilling the requirements defined in the harmonized standard EN 997 Class 1 Type 5 and Class 2 (that cover the whole European territory), but also fulfill the challenging Australian requirements of SAI/Wels 4 Stars.

For Laufen the European water label is the most reliable and transparent way for consumers and professionals to clearly appreciate the potential regarding the reduction of water consumption. LAUFEN toilets, cis-

terns and urinals are developed to reach the highest level of water saving performance. Please note that a suitable downstream drainage system must be built for this kind of water-saving WCs. In case of restrictions of the existing drainage system or local regulations LAUFEN WCs marked with green 4.5/3L logo can also be flushed with standard 6 litre flushing volume.

Flushing mechanisms

The flushing mechanism is the heart of every cistern from LAUFEN. In order to exceed current standards, the engineers of the Swiss bathroom specialist set themselves the highest quality goals during their extensive development programme.

This is also confirmed by the certifications e.g. by LGA and Q Plus. During development it was ensured that the flushing mechanisms were prepared for future development and were completely backwards compatible. Replacing "old for new" is thus no problem for sanitary technicians. The water supply options also offer flexibility, as they can be attached at the side, at the rear or from below.

The love of detail is proven by the elegant, independent design of the chrome-plated flush mechanism.

The flushing mechanisms are produced completely within the European Union. Spare parts management and service are fully undertaken by LAUFEN.

Intelligent Control System

The intelligent control system has different modes and can trigger cleaning after each user or at defined intervals with different flush quantities of between 0.5 and 3 litres. Following long periods of non-use, a hygiene flush takes place every 24 hours by default. There is also an integrated overflow protection function in case the drain hole becomes blocked.

The system's size and reliability have been optimized. The app has been updated with a very important feature: in the future, the control system can be updated via the app. This ensures that customers always have the latest software, and as new modes are developed, they will be automatically implemented.

0-litre urinal

- No physical edges
- Mechanical odour blocking
- Membrane opens on flow, closes automatically

Benefits:

- Odours do not escape the siphon
- No urine scale build-up
- Blockages are virtually impossible
- Longer use-cycle possible
- Less maintenance needed

Made-to-measure sanitary ware

Many large LAUFEN washbasins can be manufactured made-to-measure at the factory. Using this innovative production technology, we can manufacture sanitary ware to fit the plan of your bathroom. The ceramic piece can be cut to size – even on the diagonal.

Sound insulation sets

The bathroom is private. So that it stays that way, LAUFEN provides sound insulation sets, consisting of specialised foam and rubber elements for its washbasins and wall-mounted WCs. These elements considerably reduce the amount of noise due to usage and functions that passes through the wall into neighbouring rooms. Depending on the structural situation, a sound reduction of up to 9 decibels can be achieved, which means that noise is reduced by almost half.

These sets have been tested against DIN 4109 and certified by Fraunhofer.

- 89269.1 sound insulation set for washbasins up to 80 cm
- 89269.2 sound insulation set for washbasins of 80–100 cm
- 89269.3 sound insulation set for washbasins of 110–180 cm
- 89269.4 sound insulation set for EasyFit fixation system

**WITH SOUND INSULATION SET,
THE NOISE LEVEL IS REDUCED**

**SILENT FLUSH WCS ARE DELIVERED
WITH ANTINOISE PADS**

PRODUCT FEATURES AND BENEFITS – WELLNESS

Bathtub and shower tray materials

When choosing the bathtub or shower tray, material choice depends on individual preference and intended use. In order to be able to provide the right solution for all situations, LAUFEN provides four different materials:

Sentec

Bathing in a bathtub made of solid surface material Sentec feels like being in a natural basin. Due to a high percentage of mineral particles, the surface feels smooth. The innovative material also allows an incredible freedom of design: almost every shape is feasible – from very organic to very straight and architectural. Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned.

Steel

Bathtubs and shower trays in enamelled steel are hygienic, and resistant to acid, scratching, impacts and abrasion. LAUFEN steel bathtubs are produced using heavy 3 and 3.5 mm enamelled steel; they are extremely dimensionally stable and come with an anti-slip coating. In addition, they are fitted with a sound insulation system.

Acrylic

Bathtubs and shower trays made of sanitary acrylic have benefits due to the insulating properties of the material and its warm surface. Together with an underlay made of hard foam, the material helps your bath water retain its temperature for a long time. LAUFEN sanitary acrylic is integrally coloured, is light and colour fast and easy to clean.

Marbond

Marbond is a composite material made of two layers which are extremely well connected with each other: The basis is formed by a high-quality mineral casting material, the surface is coated with a two millimetre thick acrylic layer. Marbond is hygienic, easy to clean, temperature resistant according to EN 263 and anti-slip (class C).

Lighting

Coloured lighting appeals to all senses. A LED strip in the overflow slot (used in Kartell • LAUFEN bathtubs) or the integrated LED lighting in the freestanding VAL Luminex bathtub create a relaxing atmosphere. Usually, the colours of the LED lights change continuously, but one colour can also be selected via the sensor control system or remote control.

Sensors

The wellness functions of the LAUFEN whirlpool can also be controlled by touch-sensitive areas on the bathtub rim: The system is safe, scratch-resistant, hygienic and easy to clean – and does not detract from the aesthetic of the bathtub.

Sound insulation sets

LAUFEN sound insulation sets for bathtubs and shower trays significantly reduce the transmission of sound to neighbouring rooms and ensure a private, undisturbed bathing experience – without disturbing the neighbours. Irrespective of the structural conditions, a sound reduction of 10 or even 16 decibels can be achieved. Even a 10-decibel reduction corresponds to a 50% reduction in audible noise. LAUFEN sound insulation sets are tested against DIN 4109 and are certified by Fraunhofer.

Antislip

Antislip is a surface treatment which is applied to glazed and enamelled surfaces and then fired on and is thus optimally integrated into the surface structure. The surface offers a secure grip and is also easy to clean, and resistant to acids and scratching. Antislip has been tested against the German industrial standard DIN 51097 and offers higher than average antislip performance. With or without antislip, LAUFEN shower trays feel comfortable on the skin.

PRODUCT FEATURES AND BENEFITS –

Furniture surfaces

Furniture surfaces in the bathroom are designed to deal with the room's special climate conditions. LAUFEN provides a range of different surfaces, all optimised for their intended use and come with a guaranteed long useful life.

Real wood veneer

A cosy bathroom in wood. The classy wood veneers provide the haptics and optics of real wood. They are resistant to moisture and equipped with reinforced edges, making them resistant to impacts. These real wood veneers include those used in THE NEW CLASSIC, INO, ARUN and ILBAGNOALESSI 'noce canaletto'.

HPL

HPL (High Pressure Laminate) surfaces are suitable for heavy use and are exceptionally durable, even with the look and feel of wood. They are easy to care for and clean, they are light-resistant and odourless and not sensitive to alcohol, organic solvents and water. HPL coatings are used by LAUFEN for the SPACE for VAL series.

Painted furniture surfaces

Our classic high-gloss paint finish, using two-component water-resistant paints, offers perfect surfaces with no unevenness and a wide range of colours. LAUFEN painted surfaces include the white furniture of ILBAGNOALESSI, THE NEW CLASSIC, SONAR, LANI ranges. LAUFEN also offers additional multicolor options for the ILBAGNOALESSI, BASE, LANI and LAUFEN PRO/PRO S furniture ranges.

Film coatings

Film coatings are pulled over corners, thus ensuring the furniture surfaces are joint-free and not sensitive to water. They are scratch, water and light-resistant. Their flexibility offers a great deal of design freedom in terms of the forms used, such as integrated handles, for example. LAUFEN uses film coatings in its JUNA, BASE 2.0, BASE and PRO ranges.

Storage systems

Storage systems in drawers of the ILBAGNOALESSI, ARUN bathroom furniture range ensure tidy storage and prevent the return of chaos every time a drawer is closed fast.

Softclose

Slamming of doors is not inevitable: At LAUFEN, soft close means gently-closing furniture doors and drawers. The system is integrated as standard into all LAUFEN furniture. In this case, quality can be felt and not heard.

CT FEATURES AND BENEFITS – LIGHTS / MIRRORS

Space saving siphon

LAUFEN undercounter furniture can optionally be equipped with an innovative space-saving siphon (1). This dispenses with the need for siphon cut-outs in the drawers (2), reclaims valuable storage space and ensures unlimited use of internal space.

Light in the bathroom

For bathing in light: with illuminated mirrors and mirror cabinets, LAUFEN offers a wide range of individual light solutions. From integrated LED lighting (1) to fitted, dimable LED lights (2) which offers useful light directly in front of the mirror for applying make up or shaving, to glass-edge lighting (3) attached on the cabinet shelving.

Sensor switch

As an option for Frame 25 mirrors, LAUFEN offers an integrated contact-free sensor switch for mirror lighting. This means you can switch the light on by putting your hand near the mirror, without having to touch the mirror at all.

PRODUCT FEATURES AND BENEFITS

Eco & Eco+

Do your bit to save water and energy: even small changes make a big difference. Laufen has long been committed to preserving resources. For instance, through revolutionary technical solutions like the Ecototal control cartridge with integrated volume and hot water restraints, or the Eco and Eco+ water and energy-saving functions. These Eco functions make it easy for you to use less water and energy, and therefore do your bit for the environment. Faucets with the Eco+ function, for example, run cold water by default when the lever is in the central home position. Faucets with the Eco function offer standard mixer functionality, but with temperature and volume restraints to help draw attention to excess consumption.

Eco

- Smart, no-nonsense resource-saving solution for private households
- 30 % reduction in water and energy consumption thanks to a water-saving flow regulator as well as volume (Flow-Control) and temperature restraints
- Long service life and low maintenance

Additional benefit of Eco+

- No unintentional use of hot water as the faucet runs only cold water when the lever is in the central home position ('cold water start')

FlowControl

- A noticeable resistance is exerted by the volume restraint
- Once the volume restraint is overridden, the full volume of water is supplied

Thermostatic

Who isn't familiar with the situation? Fiddling with taps to get the temperature right before stepping into the bathtub or shower. Our user-friendly, highprecision thermostatic mixers provide the answer.

Practical – smart technology at a second glance

The new generation of thermostatic mixers combine temperature and flow regulation at one side. The inner workings are also remarkable. The thermostatic mixers have a built-in safety function: if the supply of cold water should fail, the hot water is stopped automatically. And, thanks to the insulated hot water line, the faucet body never gets hot.

Space-saving – flush-mounted thermostats twinplus & cityplus

Outstanding thermostat technology in the most compact design. Flushmounted thermostat mixers offer the same convenience as surface-mounted versions. In addition, with the flush-mounted solution Simibox you can simply build the technology into the wall. This saves space, and depending on the bathroom design, achieves an elegant stylish solution.

Spot on – precision selection of water temperature

38° – 48°C

Simply set the degree and enjoy your shower at the temperature of your choice. Additional safety feature: the child-friendly stop button limits the temperature to 38 °C. You have to press and turn the button at the same time (see illustration 4) for hotter water.

Economical – infinitely adjustable water flow

Regulate the water flow at the turn of a hand. Use the Eco button to easily save more water (see illustration 5). By pressing the stop button you leave the ECO range and the water runs at full flow (see illustration 6).

Showerstations

The new generation of showerstations offers a host of advantages that provide a unique showering experience: From simple designs to different settings and functions.

Slim, simple rain shower head

ø 300 mm or 300 × 300 mm, 2 mm thick, in chromed stainless steel, immediate non-drip water stop. shower head arm can be locked and swivelled horizontally by ±60°.

Adjustable wall mount

The water-carrying shower rail fastener can be adjusted during mounting:
– height and lateral compensation ±5 mm
– depth compensation -7 mm / +10 mm

Smooth MyTwin & MyCity handsprays included

Luxury handsprays with three spray modes and SmartSelect switchover function.

Easy handspray height adjustment

Push-action holder: simply press the button at the side, adjust height, let go and the spray is securely fixed.

One-handed thermostat control

Temperature and flow regulation at one side. Particularly helpful: thanks to smart water circulation, the faucet body does not get hot.

Discreet diverter

Positioned below the faucet, the simple and unobtrusive diverter switches from hand to rain spray.

Handshowers MyTwin & MyCity – Design with meticulous attention to detail

Convenience with a high pleasure factor

LAUFEN hand sprays not only look smart, they are smart. The 120 mm sprays feature the "Rain-Spray" option, the "MassageSpray" and a combination of both spray types, the "MixedSpray". A press of the SmartSelect button switches conveniently between a gentle rain shower and vigorous massage spray.

The integrated air mix enhances the soft pleasant showering experience. Thanks to RubiClean limescale residues rub off quickly and easily to ensure many years of unadulterated showering pleasure.

Technically savvy

However LAUFEN's modern hand spray technology offers even more. All sprays are supplied with the "Ecochoice" limiter. It limits the water rate to 5.7 l/min and therefore bears the 'A' energy label. Anyone preferring a higher water flow of 11.3 l/min, can remove the controller manually. Special attention was paid to the choice of materials used. All water-conveying parts are made of quality materials that comply with drinking water ordinance requirements. Thanks to the smart technology inside the hand sprays do not heat up, and thus offer perfect protection against scalding.
